

65. A controller as claimed in claim 27, wherein the power to operate said controller is provided by the system to which control information is transferred.--

IN THE ABSTRACT

Please replace the Abstract of the invention with the attached new Abstract.

REMARKS

Attached hereto is a marked-up copy version of the changes made to the claims by the current Amendment. The attached page is captioned "Version with markings to show changes made".

Entry of the above-referenced application prior to examination is respectfully requested.

Please charge any shortage in fees due in connection with the filing of this paper, or credit any overpayment of fees, to the deposit account of Antonelli, Terry, Stout & Kraus, LLP, Deposit Account No. 01-2135 (367.40268X00).

Respectfully submitted,

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE SPECIFICATION

Please amend the specification as follows:

Page 1, line 3, insert --BACKGROUND OF THE INVENTION--;

line 20, insert --SUMMARY OF THE INVENTION--.

Page 3, line 10, insert --BRIEF DESCRIPTION OF THE DRAWINGS-

-;

line 24, insert --DETAILED DESCRIPTION OF THE  
INVENTION--.

IN THE CLAIMS

Page 14, line 1, delete "claims" insert --What is claimed  
is:--

Please cancel claim 16 without prejudice or disclaimer of  
the matter therein.

Please the amend claims as follows:

5. (Amended) An arrangement as claimed in ~~any preceding~~  
claim 1, wherein the memory circuitry stores and retrieves  
control information corresponding to the user's personal  
preferences.

6. (Amended) An arrangement as claimed in ~~any of claims~~ claim 1 ~~to 4~~, wherein the memory circuitry stores and retrieves information identifying a particular system and the control information only configures the device or devices of that particular system.

8. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the system is a vehicle control system.

10. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the controller is removable from the environment of the system.

12. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the controller is a handportable radio device.

13. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the means for coupling comprises an electrical connector of an IR or radio transceiver.

14. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the device is electronically controlled by the system.

15. (Amended) An arrangement as claimed in ~~any preceding~~ claim 1, wherein the system comprises a processor and memory, wherein the memory stores the transferred information and the processor controls the operation of the device, reconfiguring it in dependence upon the received control information.

21. (Amended) A controller as claimed in ~~any of claims~~ claim 17 ~~to 22~~, wherein the memory circuitry stores and retrieves control information corresponding to the user's personal preferences.

22. (Amended) A controller as claimed in ~~any of claims~~ claim 17 ~~to 21~~, wherein the memory circuitry stores and retrieves information identifying a particular system and only outputs control information corresponding to the device or devices of that particular system.

25. (Amended) A controller as claimed in ~~any of claims~~ claim 17 ~~to 24~~, wherein said output means comprises means for establishing a bi-directional link with the system and for performing a handshaking procedure with the system.

27. (Amended) A controller as claimed ~~any of claims~~ in claim 17 ~~to 26~~, wherein said output means comprises an electrical

interface of IR interface or radio interface.

28. (Amended) A controller as claimed in ~~any of claims~~  
claim 17 ~~to 27~~, wherein the power to operate said controller is  
provided by the system to which control information is  
transferred.
